

Premium open face helmet

The SZ-F is the perfect choice for commuters and touring riders alike. The large visors offers ample weather protection while the comfort and fit make even long hours in the saddle effortless. The SZ-F offers an efficient ventilation system with multiple air intake and exhaust ducts. Replaceable cheek pads make a custom fit possible. Properties that have made the SZ-F a long-time favourite among riders looking for all-day long comfort.

General

- ✓ Outer shell SFL

Front ventilation

- ✓ Dual intake
- ✓ Standard brow vents**

Rear ventilation

- ✓ Rear exhausts

Interior

- ✓ Replaceable Ear cups

Approval

- ✓ ECE 22-05

** Innovated and exclusively offered by Arai

SZ-F
Diamond Black

Available sizes: XS-XXL

Eye brow ventilation

Fresh air can enter directly to the forehead area without the need for holes in this critical area of the shell and impact absorbing liner. For specific models the ventilation is extended to the temple area.

Effective ventilation

Dual Intake designed for increased airflow en lower noise level, guiding fresh, cool air into the interior. Dual rear exhaust extracts more hot air from the helmets interior and improves aerodynamics.

Replaceable ear cups

Ear cups with their shock absorbing liner are offered in different thickness sizes, to make a more custom fit possible. There is ample room around the ear area for better comfort and plenty of space for a communication device.

Hyper Ridge

The 'bumper' is a reinforcement band that circles the bottom of the shell adding strength and lowering the helmet's centre of gravity. Flares out for easier putting on and taking off.

GENERAL ARAI FEATURES

Five times inspected

Each Arai helmet goes through five separate quality-control departments: after the shell is made, after painting and graphic completion, after assembly and two in-process inspections.

Washable interior

The premium quality interior of any Arai helmet can be easily cleaned, in place, with mild soap and lukewarm water.

Handmade

It can take up to five years for our experts to earn the right to create an Arai shell. Each shell can take up to 27 steps and to build one Arai helmet will take about 18 man-hours.

All-day comfort

All-day comfort with the Arai interior fit and shape together with the finest liner materials and the extensive ventilation system. And thanks to the perfect balance and weight distribution of the helmet, you hardly notice you are wearing an Arai.

Penetration tested

All Arai helmets are penetration tested, although not required by European helmet standards. The Arai penetration test is performed with a 3kg test cone that strikes from a height of 3m on the helmet.

Double-D ring device

The flat and D-shaped rings fit smooth against the chin. No moving parts, no corrosion problems and just pulling the tab is enough to loosen the fastener.

Smooth shape, better protection

The smooth outer shell of Arai helmets is designed to glide without unnecessary resistance. You don't want to decelerate your helmet more than necessary. That's why all Arai vents and ducts are designed to break off during an impact.

Hard outer shell, soft inner shell

Arai uses a very hard outer shell to spread impact forces and a soft inner shell to absorb remaining energy. The multiple-density EPS inner shell is made using a unique technology of combining three to five densities in various areas as a single component.

Organic shape

The organic shape of an Arai outer shell offers a more natural appearance, seals better and conforms more to the head's natural shape for improved comfort, fit and to help minimize wind turbulence.

5-year limited warranty

All Arai helmets are warranted against defects in materials and workmanship, and are serviceable only for the properly fitted first user for 5 years from date of first use, but no more than 7 years from date of manufacture.

Different outer shells

Unlike many other manufacturers Arai provides one size outer shell for each two-helmet sizes for most models. Together with different shaped outer shells for different models it is almost impossible not to find the fit you are looking for.

Arai In-house test

This Arai helmet is designed to meet the stringent Arai In-house standard requirements, in addition to mandatory standards such as ECE 22-05 and voluntary standards such as SNELL M2010.
